

# RAILWAY RAMBLERS

This document will help walk leaders to provide the information that members have asked for in the club's walk programmes. If you are using the version created in Microsoft Word, the boxes on the right will expand as you type in them.

'Optional extras' are car parking details, grid references for obscure locations, an assessment of walking difficulty, and estimated finishing time. The location of the lunch stop, if known, is useful for members who cannot do the whole walk.
